History They might have been nuns, strikingly beautiful, living in a convent near Changey, above Pernand-Vergelesses, who would walk down to this hillside for their strolls.

Soil Silty, sandy soils mixed with chaillots (siliceous remnants from flint limestone). The steep slope and high rainfall in Pernand-Vergelesses contribute to erosion.

Our plot(s) 26 ares planted in 1985, located between 290 and 310 meters in altitude. The slope ranges from 10% to 15%.
