The vine

Plot /climat Les Levrons

History A diminutive form, from the 14th century, of "lièvres" (hares), which were abundant in this area.

Soil Clay soils, deep and poorly draining. The presence of limestone alluvium can be seen in the numerous scree scattered across the plot.

Our plot(s) 60 ares planted in 1947, this is our oldest Chardonnay plot. Some vines from this vineyard were selected for their high-quality planting material to be part of the "Conservatoire de Beaune," which aims to preserve the finest Burgundy vines. Southeast exposure, at an altitude of 230 meters. This area is particularly prone to frost, requiring special attention.
